## PROFESSIONAL SUMMARY

**Fullstack** developer with 1 year of experience in building **web** and **desktop** applications. Proficient in **Python, REST APIs, React JS** and integrating **payment systems**. Demonstrated ability to deliver high-quality software solutions across diverse projects, including data collection, warehouse management, and educational platforms. Seeking to leverage my skills and experience to contribute to innovative projects at a dynamic tech company.

## SKILLS

Python Programming	★★★★☆
Django Framework	★★★★☆
RESTful APIs	★★★★☆
React JS	★★★★☆
SQL/NoSQL Databases	★★★★☆
Linux/Unix Administration	★★★☆☆

## EXPERIENCE

**Python Developer** 2023 - Now  
**SoftAge Software Solutions Pvt Ltd, India, Gurgaon**

- Developed and maintained a data collection website using Django and React.
- Created a Windows application for video data collection, enhancing data processing efficiency.
- Implemented a warehouse management system, improving inventory tracking and management.
- Built a US-based website for teachers to prepare and download exam papers, integrating a payment API for subscription management.
- Provided REST APIs for backend implementation of an Android app, ensuring seamless data exchange.
- Created Dashboards for Admin, Statehead and Superusers for proper order management and tracking.

## PROJECTS

**Rider Tracking and Order Management System** 2024 -  
**India**

**Technologies:** Django (REST API), ReactJS, PostgreSQL/MySQL, Android, JavaScript, HTML/CSS, Bootstrap, Celery, Redis.

**Description:** Provided backend services for an Android app to facilitate data exchange and processing as well as created **Dashboard** for users with different Roles like **Admin**, **Statehead** and **Superuser**.

**Contribution:**

- **Developed a web-based platform** using Django (REST API) and ReactJS for tracking riders and managing orders, accessible by admins through a user-friendly interface.
- **Implemented a comprehensive order management system** for admins to view and update order statuses, track order history, and manage rider assignments.
- **Designed RESTful APIs** to seamlessly integrate the front-end ReactJS application and the Android app with the Django backend.

**RegentsIQ Education Platform**  
**United States**

2024 -

**Technologies:** Django, Django Templates, Stripe API

**Description:** Developed a website for teachers to create and download exam papers.

**Contribution:** Integrated payment gateway, designed user-friendly interfaces, and ensured secure transactions.

**Warehouse Management System**  
**India**

2023 -

**Technologies:** Django, MsSQL, RestAPI.

**Description:** Created a system to manage warehouse operations, including inventory tracking and order management.

**Contribution:** Designed database schema, developed RESTful APIs, and implemented frontend features.

**Windows Application for Video Data Collection**  
**India**

2023 -

**Technologies:** Python, PyQt6.

**Description:** Built a desktop application for video data collection and processing.

**Contribution:** Developed user interface, integrated video capture functionalities, and ensured data integrity.

**Crash Course in Python**

2023

Coursera

**C++**

2023

Spoken Tutorial

## INTERNSHIPS
